Subject: Introduction of EU-Compliant Protocol for International Declarations

Issued by: Ministry of International Trade and Revenue Coordination

In compliance with Council Directive 2014/98/EU, all international declarations shall, effective immediately, adopt Protocol V1 for structured reporting.

Highlights of the protocol:

- Consolidated filing under country-based aggregation schemes
- Mandatory monthly data reconciliation with Customs Central
- Inclusion of VAT alignment markers for cross-border declarations over €50,000

This protocol introduces stronger ties between tax compliance and customs reporting. Legacy declaration templates will be supported through Q4 2015 only.
