**Subject:** Migration Report – Transition to New Enterprise Payment Platform (EPP)

**Issued by:** Directorate of Financial Systems Modernization

The transition to the new Enterprise Payment Platform (EPP) concluded in Q1 2019 and introduced a fully integrated, rules-driven workflow for all RP-related approvals.

Key milestones of the migration:

- Decommissioning of the legacy RP-Form tool
- Unified vendor ID validation with procurement systems
- End-to-end tracking of invoice fulfillment stages

While legacy drift patterns may appear in archived logs, this report concerns a structural change that occurred well after the observed drift period.
