Subject: Optional Training Workshop – Conceptual Workflow for New Photo Ticket Issuance
Issued by: Office of Enforcement Techniques – Ministry of Transport

Enforcement units are invited to register for an upcoming **optional training workshop** on October 11–12 regarding a **draft proposal** for modernizing photo-based ticketing. While the system is still in early conceptual stages, participant feedback will shape technical feasibility assessments during Q1 2003.

Workshop topics will include:

- Overview of potential new camera network configurations
- Case simulation: Linking license plate recognition to fine generation logic
- Discussion on automation triggers for nighttime violations

The proposed workflow has **no legal standing** and is not scheduled for formal implementation in the current fiscal year. Attendance is encouraged for staff involved in traffic control, evidence management, or digital enforcement planning.

Travel and accommodations for staff traveling more than 80km will be reimbursed according to standard ministry rates. Please submit attendance requests to the Workshop Registrar by October 9.
