📍 Update: Campus Wi-Fi Reconfiguration Complete

Posted by: IT Services — 19.10.2017

We've completed the final stage of the **Wi-Fi optimization project** across the main campus. All academic buildings now support **Eduroam 5GHz bands**, which improve signal quality in lecture halls and meeting rooms.

✅ What's new:

- Guest login now available via short-term passcode

- Network SSID "UniversitySecure" has been retired

- Outdoor access points added in courtyards D & E

If you're experiencing connection issues, clear saved networks and rejoin **eduroam** using your staff credentials.

🛠 Support: wifi-support@university.edu
